Well done, even forkastically done, and kind of fun. For 5 minutes. Ok if you get it for free or in a bundle but I think nobody would seriously mean to recommend this game to others :). really weird crowd (like 10-20 people playing) -- typical noob-shamers, no wonder nobody plays.. terribly excited over trying this game, love indie horror.

full graphics settings, looks brilliant, control is awesome

see a phone, answer, hide in bathroom, chairs get thrown at me but my cat like reflexes allows me to dodge...go in office get the passcode to the door

get to the door unharmed but notice some black cloud like clumps just around the corner

Face door, go to input the code, mouse will not click the buttons no matter what I do. 4.5 hours is actually afk left myself standing there, luckily these demons dont attack if you are away taking care of irl stuff...

restart, get stuck at same part, cannot input door code....

Watched walk through on youtube, Must have been fun, continued to look great throughout.. 1. Buy this game for you and your friends.

2. Join up and beat the\u2665\u2665\u2665\u2665\u2665\u2665out of eachother with baguettes and katanas,

3. ?????

4. Profit. The game won't stop subtly nagging me to review it after every level, so I'm going to indulge it. With my foot up its♥♥♥♥♥♥

A lot of terrible game reviewers call it "Bomberman + Metal Gear" in all of their dry, cliched, poorly written ♥♥♥♥♥♥♥♥t. I like to call it a cross between the keycard hunts from Doom (the most boring part) and a bad stealth game with one-hit deaths and sloppy, unintuitive stealth mechanics that feels and plays like it was made in 1992. So essentially, I think a better name for this game would be "Are You Afraid Of Keycard Hunts In The Dark? For Windows 3.1".. Very scary game 10/10. This was my favorite game by Humongous back in the day, and I played quite a few (with the exception of the Spy Fox series, much to my regret). If you like point-and-click adventure games, have a kid between the ages of 3 and 8 (although some kids might want to play this all the way up to 10 or maybe 12), or have played this game in your childhood, you NEED this game.. Surprisingly good lane defense title. The game does start out incredibly bland and until the first hour and a bit I was certain this was going to get a negative review. I stayed with it and was glad I did. The game typically got better and better.

There's a few things I feel you should know if you're thinking about investing your time into this game:

1) After a certain point, the game is highly punishing. There's no lifelines e.g. 'lawnmowers' as in PvZ; if one enemy breaches

---

your defenses, it's level over. This can be extra punishing as many levels consist of multiple rounds meaning that if you have a breach in the third or fourth round of a level, you have to start from the first round of that level, not the round you actually lost.

2) There's almost no help/tutorials. There's quite a lot of options and effects for your towers which are generated by combining different syringe colours. The options are implemented well and you will need to exploit them to progress and win the game. You'll have to figure this out yourself. Some bosses have very strange tactics which you'll be completely in the dark about.

3) There's actually a fair amount of content but new content isn't really handed to the player in a linear fashion. Later into the game, I feel syringe acquisition becomes faster as does enemy type. Early on in the game, you may be bored to tears with only a few syringe types.

4) There is a fast forward button which will come in very handy if you know about it. Middle mouse button.

For fans of tower defense.

7/10

. fun game to play with friends if you only have a short amount of time to play

+ fun announcer and bonuses

- expensive for what you get

- gets repetitive quickly

- the sequel was free and had way more content, this game was abandoned and not fully fleshed out

If you like basic, 3rd person shooter MOBAs, you will probably enjoy this--but it gets old fast; but good for brief matches.

It's a good game but it doesn't last.. WIZARDY !!! 8,5/10 If y like Wizardy games buy this game !!! ITS Worth every penny!!!

I played War Thunder then I launched PBaV and I understood that War Thunder sucks, because it's less realistic, dynamics and beautiful than this game. 11/10 maybe even 12/10. Nepenthe is a unique RPG with lots of personality and charm. The characters are all interesting with creative designs that fully embrace the hand-drawn aesthetic. The dialogue is always humorous and the battle system is a joy to play. This is a game for fans of other alternative-RPG gems like Undertale, Space Funeral and Off.. The developer has just added a patch that improves the performance, and also adds a sort of chapter selection to the game so you no longer have to play in one sitting. Full original review below.

Okay so let's get the bad out of the way first. Despite being built on the UDK engine I had some pretty choppy performance in game with lag spikes and hitching, but overall the performance was okay. Also the game is short with no saves, so you will need to complete it in a sitting. Oh and the less said about that menu screen the better. Finally controls are not rebindable.

So as to the game? Actually it's half decent. The graphics are fairly good - if somewhat repetitive with the same textures and gloomy areas. Both the puzzle and horror elements are fairly light. Most of the puzzle elements are a bit "find the key," and the horror is more a decent creepy vibe and the odd jump scare - but it does not overuse them. And the procedural generation does at least keep the layout interesting, and leads to a "I've been here before" vibe.

Audio is quite sparse but again is used pretty effectively to build tension and atmosphere.

So if you're in the mood for a game that veers to the more atmospheric creepy horror then for the money this is a half-decent offering, but not a must-play by any means.. This game is very atmospheric. The music, honestly, is one of the biggest contributions to the game. I thoroughly enjoy it, even though it is rather dark. And really, for this kind of game, \$1.99 is perfect. No, you won't get a huge amount of replays out of it, once you gather the entire story. But the three, four, or five plays to do it are well worth it.. It's okay, since it's worth 1\$.

Lacks the "one more try" feeling though. Hands down the best 99 cents I've ever spent :D

The game provides a nice bit of fairly challenging levels and enemy variants, and a small but diverse arsenal.

It's full of strange humor and quips.

A great game for achievement hunters like myself.
